

RTO *Cloud* data

WHAT IS RTO DATA CLOUD?

A cloud based RTO student management system that provides RTOs the capability to manage their training operation and meet all national and state reporting and compliance requirements.

"We have been providing AVETMISS compliant SMS's to the VET sector for almost a decade!"

SYSTEM FEATURES:

Cloud based

Access it from anywhere, anytime and receive live updates.

Reporting

Compliant with AVETMISS and all State and Territory funding contract reporting. Build customised internal reports using our report builder or choose from our designed reports.

USI

Verify and locate USI's live in the system.

Training.gov integration

Import training products direct from TGA.

Website integration

Integrates with your website via our free API library to support online enrolments, publish course marketing details, course calendar and collect online enrolments.

Tailored training plans and schedules

Create your own training plans and schedules allowing you to customise your services and manage your enrolments as a cohort.

SMS messaging and emailing

Send SMS messages and emails to learners directly from within the system.

Compliance management

Quality improvement, complaints and appeals, meetings, trainer professional development and more.

Client management

Manage employers with multiple learner enrolments and tailored payment plans, partners and contractors.

Customisation

Issue compliant, customisable and secure electronic and hard copy certificates. Customise email templates, enrolment form, dashboard, quick links, user access levels, and more.

Bulk actions

Do things in bulk to save time. Update enrolment outcomes, issue certificates and send emails or SMS messages.

Import data

Import your AVETMISS data from your current student management system.

Hosting and security

RTO Data Cloud is hosted within the Equinix SY3 Sydney IBX Data Center. This is the most interconnected, fastest and secure data storage center in Australia which boasts an amazing high average uptime track record of greater than 99.9999%. Your data is protected behind a world class firewall and your data is encrypted whilst being stored and in transit. We also backup your data twice daily to a separate secure server.

“Unlike other systems, we do not piece meal out capability as additional add-ons and modules.

With RTO Data Cloud, you get everything that it has to offer now and in the future as we continue to evolve and develop its capability.”
